

BNC Wins National Recognition at IIT Delhi

Academic Achievement: National Recognition at IIT Delhi

Title of Research: The Invisible Truth: Tracking IAQ in a College Campus

Event: National Conclave on Nutrition & Climate Goals 2026

Venue: Indian Institute of Technology (IIT), Delhi

Date: March 14, 2026

Bhagini Nivedita College achieved significant national recognition in the field of environmental research and sustainability. A research team led by Dr. Priyanka Kulshreshtha (Faculty, Department of Home Science) and comprising students Akanksha Singh, Neha Sharma, Neha Kumari, and Anushka Mishra (B.Sc Hons Home Science, IIIrd year) secured the Third Position in the competitive Poster Presentation category at the National Conclave on Nutrition & Climate Goals 2026.

The award-winning poster, titled "The Invisible Truth: Tracking IAQ in a College Campus," presented a detailed monitoring study of Indoor Air Quality (IAQ) within the college microenvironment. Under the theme of "Integrated Solutions for Nutrition, Environment, Indoor Air Quality and Climate Action," the study highlighted the critical link between indoor pollutants and the health vulnerabilities of the campus community. The research was evaluated and recognized by a distinguished panel from CERCA (IIT Delhi), CSIR-NEERI, and the Glenmark Foundation.

This success underscores the college's commitment to fostering a robust research culture. The project was carried out under the visionary leadership of our Principal, Prof. Ruby Mishra, whose constant encouragement has been pivotal in driving environmental initiatives on campus. Technical and administrative guidance was provided by Prof. Rachna Mohan (IAQC Convenor) and Ms. Anupama Agarwal (Teacher in Charge), ensuring the project met high academic and professional standards.
