

Eco Gardening and Waste Plastic Utilization Activity (25 August 2025)

On **25 August 2025**, the **Eco Club Harit Nikunj** organized an **Eco Gardening and Waste Plastic Utilization Activity** with the objective of promoting environmental sustainability, waste reduction, and responsible gardening practices. The activity witnessed enthusiastic participation from students and faculty members, who collectively worked towards developing an eco-friendly garden within the college campus.

During the programme, plastic waste collected from the garden area was creatively repurposed into functional planters using discarded plastic bottles, containers, and old tyres. The activity demonstrated the practical application of the principles of **Reduce, Reuse, and Recycle**, encouraging participants to view waste as a valuable resource rather than a disposal problem.

Besides beautifying the campus, the initiative provided students with hands-on experience in sustainable landscaping and environmental conservation. It highlighted the importance of responsible waste management and inspired participants to adopt eco-friendly practices in their daily lives. The activity successfully combined creativity with environmental stewardship, contributing to the development of a greener and cleaner campus.
