

Lecture and Hands-on Workshop on Emerging Drone Technologies

Dates: 21 & 25 November 2025

With the objective of introducing students to emerging technologies and enhancing their employability skills, Bhagini Nivedita College, through the Eco Club Harit Nikunj, organized a Lecture on Emerging Drone Technologies on 21 November 2025, followed by a Hands-on Drone Workshop on 25 November 2025 in collaboration with WOW Go Green LLP under the Delhi Drone Didi Scheme.

Addressing the participants, Principal Prof. Ruby Mishra encouraged students to embrace innovation, technological advancements, and skill-oriented learning to prepare themselves for future career opportunities.

Dr. Priyanka Malik, Convener of the programme, motivated students to participate in upcoming drone pilot training initiatives and highlighted the growing significance of drone technology in diverse sectors. The technical session was conducted by Mr. Ajay Singh Khatri, who introduced students to the fundamentals of drone technology, its applications in agriculture, environmental monitoring, disaster management, surveying, logistics, and infrastructure development. During the practical workshop, participants gained hands-on exposure to drone operations and safety protocols, making the programme both informative and skill-oriented.

The programme successfully familiarized students with emerging technologies while encouraging them to explore new avenues of innovation and entrepreneurship.
