

National Workshop on Water Resources Planning and Management

The Department of Physics, in collaboration with the Eco Club, organized a National Workshop on "Water Resources Planning and Management in BNC & Kair: A Regional Approach" on 16 February 2026.

The workshop featured expert lectures on important environmental issues, including water pollution, climate change, ecosystem conservation, and sustainable water resource management. The interactive sessions encouraged students to understand the significance of environmental conservation and adopt sustainable practices for responsible resource management.

The workshop successfully sensitized participants to contemporary environmental challenges while promoting interdisciplinary learning and scientific awareness.
